Extra Requirements

Email Virus Scanning

- \$99** per domain per year
The email anti-virus service works by scanning all your incoming mail for viruses. If a virus is detected, the entire message is quarantined on Westnet's servers and a notification message is sent to you detailing the infection.

Email Spam Filtering

- \$49.95** per domain per year
Spam can be difficult to detect; hence the prevention of spam can also be very difficult. The method we use does not guarantee that you will not receive any spam, but it will significantly reduce the amount of spam you receive.

Email Protection

- \$119.00** per domain per year
Email Protection combines both Email Spam Filtering and Virus Scanning at a discounted bundle rate, saving you \$29.95 per year.

Note: If you've selected a Mail Relay service, you will need to choose the Email Protection (combined Anti Spam & Anti Virus) service. Standalone AV or AS are not currently available as options.
